

# The gateway to responsible natural resource production, trade and transformation.

A single integrated platform enabling actors across the supply chain to improve and demonstrate ethical and responsible practice.

World leaders in ethical minerals and metals with a growing presence in other natural resource supply chains.

**The RCS Global Group: Positive business improvements | Positive impacts on people and planet**

- Natural resources can be produced, traded and transformed in a way that generates positive impacts on people and the planet.
- **It is our mission to make this happen.**
- We are connecting and capacitating actors throughout supply chains to achieve responsible production, trade and use of natural resources. Our work is delivering positive economic, social and environmental impacts.

The experience and expertise of our staff coupled with our cutting edge tech solutions enable us to address the full spectrum of ethical sourcing needs.

Our work spans due diligence and compliance, to chain of custody and blockchain-backed traceability, to sustainability program implementation and assessment.

Contact us to discuss how we can support your business.
